<https://github.com/alexwebjr>

Full-Stack Web Developer with more than 4 years of professional experience, mainly using **C#, .NET, JavaScript, Node.js and SQL**. I have experience working in different sectors such as startups, EdTech, and Government.

EXPERIENCE

9-1-1, Full-stack Developer — October 2021 - Current

- Improved employee management time through the development of a resource planning system for the HR department.
- Improved the survey creation time through the development of a dynamic survey application that allows the administrator to manage dynamic forms so that they can later be filled out by quality agents.
- Reduced by 95% the number of bugs from different applications of the institution through maintenance and ticket solution.

Tech Stack: JavaScript, C#, Asp.Net, DevExpress, PHP, SCRUM, MSSQL, Semantic UI, Bootstrap

UNIBE, Supervisor E-learning Platforms — August 2020 - October 2021

- Supervised the process of enabling the virtual space to teach online classes. Making it possible for the university to teach all its subjects virtually in times of covid.
- Led a team of 3 supporters and 1 analyst.
- Improved the teaching portal through the redesign of the web page.

Tech Stack: JavaScript, PHP, Laravel, MySQL, Materialize CSS, WordPress

WELLTECH, Full-stack Developer — May 2019 - August 2020

- Developed the web application for an appraisal company. Developing quality code, integrating Zoho CRM API, and AZUL API.
- Translated to C# a geolocation library written in PHP.
- Designed the web portal for different clients.

Tech Stack: JavaScript, C#, Asp.Net, PHP, Bootstrap, Zoho CRM, API RESTful, jQuery

SOCIAL BOIL, Front-end Developer — July 2019 - December 2019

- Improved and optimized the loading time and the positioning in browsers by updating and optimizing the web pages of different clients.
- Designed the web portal for different sports federations and other organizations.

Tech Stack: JavaScript, C#, PHP, WordPress, Umbraco, HTML, CSS

FREELANCER, Full-stack Developer — January 2016 - Current

- Improved service administration time for an auto detailing company by designing an online booking website.
- Improved the response time to services for a car rental company by designing a website where customers can rent vehicles online.
- Designed and developed a landing page integrating WooCommerce with Zoho CRM.
- Improved the brand image of an influencer through the design of her website.
- Designed and developed the website for a lens distributor company.

Tech Stack: JavaScript, C#, PHP, WordPress, HTML, CSS

PROJECTS

Job Portal — <https://github.com/Alexwebjr/Empleos> - 2022

- Designed and developed an app to publish job offers, with dynamic management of ads with google ads. **Tech Stack:** Node.js, React, Redux, Material-UI, Sequelize

Event Portal — <https://github.com/Alexwebjr/Natours> - 2022

- Developed a web app to handle events, including payments with the stripe API. **Tech Stack:** Node.js, Express, MongoDB
