POSITION

Software developer

WORK EXPERIENCE

04/07/2018–Present

Software developer

Landmark Technologies, Tirane (Albania)

- Java developer for implementing new request.
- Troubleshoot technical problems.
- Ability to write efficient OO codes.
- Ability to support enterprise wide and service oriented JAVA
- Understanding of object oriented design.
- Database SQL Server & MySql.
- Exposure to Java and J2EE technologies-RestFul webservices.
- I used to work with JAVA 8 , JPA,EJB,REST,HIBERNATE.
- Familiarity with Maven,JavaEE,Karaf,Docker,Git.
- Practical use of Web Services Technologies such as REST,SOAP.
- Develop new and support existing functionality in JavaEE.

04/07/2016–04/07/2018

Software developer

Smartwork, Tirane (Albania)

- Full stack developer for implementing new request on Enovia PLM technology.
- Troubleshoot technical problems.
- I used to work with JPS,JPO,MQL,TCL,MatrixOne.
- Develop new and support existing functionality in Enovia.

03/02/2016–04/07/2016

Software developer

ENG.al, Tirane (Albania)

- Multiplatform media development company.
- **Wrgworld.com Project Team-Member**
- Utilized CSS and HTML to design the front-end webpage for a cosmetics productcompany.
- Created a relational database of the customers product line using MySql database.
- Set up an Admin page for the company to easily edit prices, update product pictures.
- **SQLServer**
- The retrieval of data is only done through stored procedures so working with the Database Administrator to develop procedures/functions/triggers was an important part of myjob.
- Databases consisted of SQL server 2008.
- I worked with the Database Administrator to create jobs/reports and schedule them while checking

existing jobs not to overload the server. He had me consistently check execution times for jobs to increase performance in making sure jobs are spanned properlyovernight.

04/11/2015–02/04/2016	**Software developer**

ArmundiaFactory.al, Tirane (Albania)

- I have worked on a project related to insurances which included implementation of rules on determination of a insurance policy.
- Project was on MVC , where in frontend i have used Flex and on implementation of rules i have used JavaEE.
- Relational database and communication between Java and DB was done by hibernate.
- I used to work with JavaEE, Flex, Hibernate, JBoss.
- Database optimization was done by creating java methods therefore data was proccessed fast and application performance was high.

EDUCATION AND TRAINING

2011–2014	**Bachelor of Science, Informatics/Programming,**

TIRANE (Albania)

2014–2016	**Master in Informatics**

Tirane (Albania)
